RE: Material Verification Letter

Dear Mr. Brown:

This correspondence provides information relevant to LEED certification for products manufactured by Columbus Brick Company.

Please find two figures attached. Figure 1 shows a 500 mile radius around the Columbus Brick Company manufacturing facility. This figure will assist in verifying that materials obtained from Columbus Brick were "fabricated or manufactured within 500 miles of the project".

Figure 2 shows the location of the clay mines that provide 99.2 percent of the raw material for Columbus Brick products. This information will assist in verifying that materials used in Columbus Brick products were "harvested or extracted within 500 miles of the project".

In addition, I am able to certify that Columbus Brick Company is in compliance with all environmental regulations known to apply to the Columbus Brick manufacturing facility and clay mines.

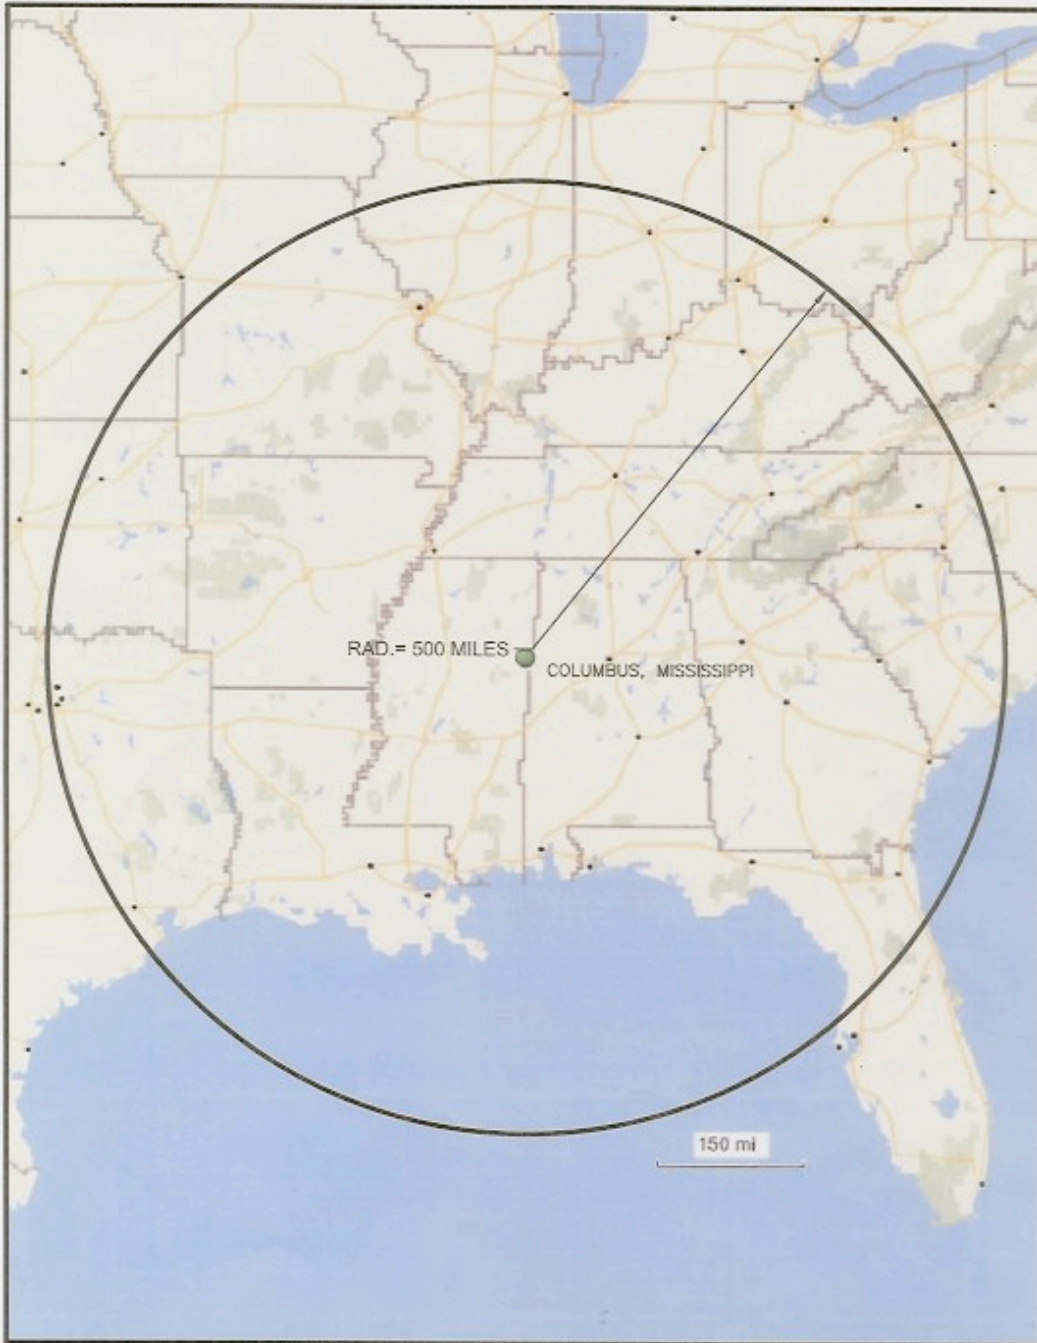

Feel free to contact me if I may provide any additional information.

Sincerely,

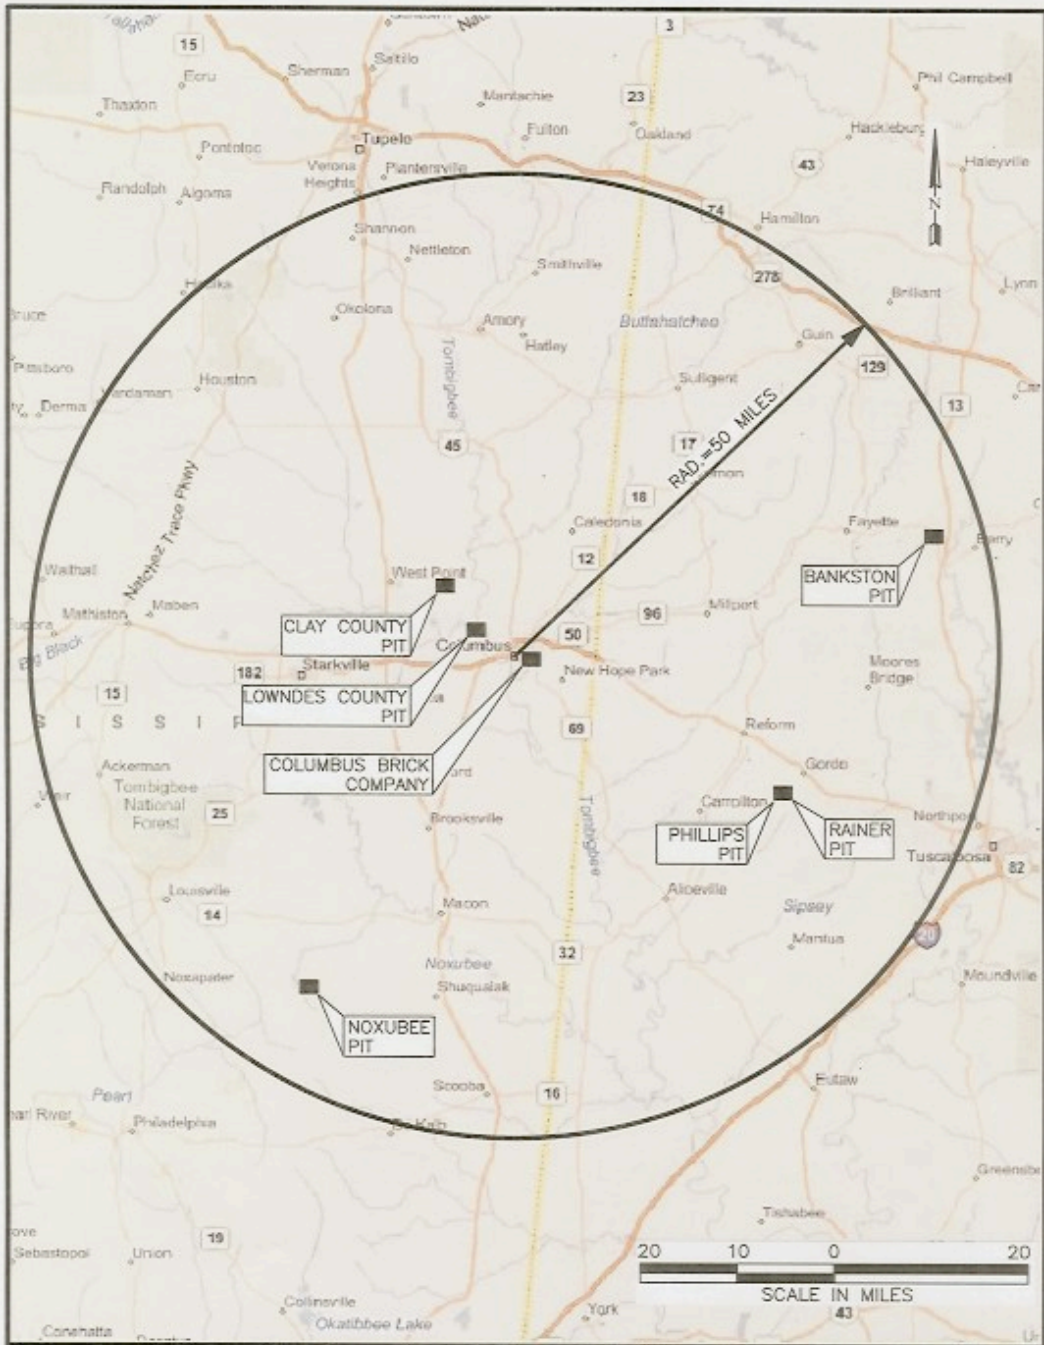

Carey Hardin, P.E.
